

ACFLEX

LED flexible tape which can be hard-wired directly into the mains electrical supply with no requirement for a driver.

Encased in a clear thermoplastic jacket, this LED tape is also dimmable and is available in two output options.

Suitable for a variety of commercial and residential applications

Features

- Incorporates driverless AC-LED Technology
- High output 3 Step MacAdam LED's ensure consistent colour output
- Smooth dimming
- Constant current integrated circuits provide uniform intensity over the entire run
- Optically clear thermoplastic jacket
- 50m maximum run length
- Quick Installation with channels or clips
- 160° beam angle
- CRI 75+, 120lm/W, 3000K/4000K
- 220V AC / IP67

Accessories:

- Mount "U" Clip (clear)
- Plastic Mounting Channel (clear)
- Connecting Cable End Cap (must be used at the end of every run)
- Hard wire power cable with surge protection
