

With 'Bat Hat' option

SOLAR PUCK

Solar Puck ground lighting units are designed to provide 360° night time visibility in off-grid areas. They fit almost flush with the ground surface and are skid-resistant, making them an ideal option for cycle paths and pedestrian walkways.

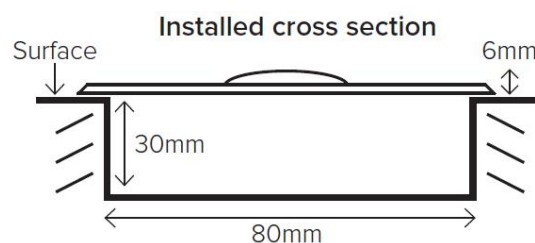

By minimising light pollution they're eco-friendly too.

Constructed from industrial grade polycarbonate and compression tested to 55 tonnes, Puck solar ground lights are certified IP68 waterproof and IK10 impact resistant and almost 100% vandal proof.

Tested in UK weather conditions with ongoing rigorous quality control, this is the practical, economic and sustainable wayfinding lighting solution.

Features:

- Simple to install & maintenance free
- IP68 & IK10 rated
- Vandal proof
- 'Bat Hat' option to reduce upward light spillage for conservation areas
- Low-cost installation
- Long led lifespan: 100,000+ hour
- Long life batteries: 8+ years
- Automated on/off function
