New Column option available on request. Direct buried (1m buried and 3m display) in Black.  
Also compatible with standard 76mm columns.

## Pathfinder – Solar Pedestrian Lights

Our Solar LED Pedestrian Lights are a very popular type of fitting especially for commercial applications. They can be installed in and around car parks, at entrances to commercial buildings, along footpaths and in outdoor shopping centres. They are very easy to install, incredibly efficient and the LED light output is perfect for providing low level amenity lighting without causing light pollution. These lights come with an automatic switching function (auto power on/off) and a wireless controller to configure smart dimming schedules, running status and power control.
